

Heribert Konzett Award of the Austrian Pharmacological Society (APHAR)

CALL 2022

The Heribert Konzett Award is awarded annually by the Austrian Pharmacological Society (APHAR) in order to honour outstanding achievements of young scientists who are already conducting independent research in the field of experimental and clinical pharmacology as well as clinical pharmacology and to support their further career. The award sum is 3,000 Euros and is generously provided by AstraZeneca Austria. The Heribert Konzett Award cannot be shared.

In order to make up for the fact that the award was not given due to Covid-19 in the previous year, APHAR will award the prize to 2 prize winners this year (for 2021 and 2022).

The award shall be given to scientists who at the deadline for submission have not yet reached the age of 42. The prize is awarded to individuals who have published their research in generally recognised scientific publication media and who perform their research independently by successfully applying for third-party funds. Applicants must be a member of APHAR.

Applications for the Heribert Konzett Award 2022 must be submitted until **15 July 2022**.

Documents to be submitted:

1. Proof for the successful personal acquisition of scientific third-party funds including a list of projects with confirmation of the respective funding organization which must include proof that the applicant has personally applied for and has received the funds.
2. A list of publications that were the results of these projects (insofar as they have been published already).
3. A complete list of all publications of the applicant (separate lists for Full Papers and Abstracts).
4. The most relevant publications should be available as PDF Files.
5. A covering letter with a statement that all requirements for application are met (see <http://www.aphar.at/awards.html>) must be submitted as signed original as PDF).

All documents must be submitted to the Secretary General in electronic form via e-mail as PDF).
